has anyone been successfull in installing a "Avantalk C82 LEA "on a "2020 M1 MacBook Air" which lacks a "USB audio port"?

Here's what's known about using the **Avantalk C82 LEA** (USB-C LE Audio Bluetooth dongle) with a **2020 M1 MacBook Air** (which *only* has USB-C/Thunderbolt ports and no traditional USB-A or 3.5 mm audio port):

✅ Official Compatibility

- The manufacturer advertises the C82 LEA as **"USB-C compatible"** and states it *should* work with Macs, PCs, laptops, and consoles — essentially any device with a USB-C port. Avantree +1
- It is fundamentally **plug-and-play** with no drivers required, and designed to be
